## Danilo Planter Lite®

Shown in Stone Grey

### Lite® Collection

Lite® planters are rated for both indoor and outdoor use and frequently specified for rooftops and terraces, hospitality projects, public space installations, and restaurants. They are a great choice for jobs that do not allow for heavy-weight materials and where large scale plantings are required. Because of their light weight, fiberglass planters are easier to ship and material handle on the job. Fiberglass planters can withstand UV exposure and extreme temperatures, from high heat to frost and can tolerate the seasonal thaw cycles. Additionally, they won't corrode due to exposure or direct contact with soil. There is no need to use plastic liners with planters. Although we recommend that you take advantage of the quick turnaround of our stocked product; these shapes, finishes, and/or sizes are not always right for every job. All recommended commercial products

Item Description	Item #	Available Colors <i>*denotes custom order</i>	Material	Texture	Outside Dimensions	Inside Top Dimensions	Base Dimensions	Approx. Weight	Approx. Soil Capacity

## Isometric View

## Top View

**Materials:** unsaturated polyester resin, sand, stone powder, talc powder, and fiberglass

**Care & Maintenance/Outdoor Planting Instructions:** Our fiberglass planters are equipped with pre-installed drainage holes and raised feet to allow for drainage. The drain holes must be kept clear to maintain the longevity of your planter, especially in climates that undergo freeze thaw cycles in the winter. We recommend: Covering the drain holes with a mesh screen or equivalent to keep debris from clogging the openings; Filling the bottom of the planter with non-porous drainage material; Filling the remainder of the planter with a well-draining soil mix that will not retain water; and lastly, covering the soil with decorative mulch or pine bark to the top rim of the planter to discourage water from pooling on the surface. For indoor use, we offer a saucer system for the Farnley and Sandal planter series and plugs are available upon request.

**Cleaning Instructions:** Planters can be cleaned with either water or Windex® with Ammonia-D. Spray down the surface of the planter where it is dirty and use a lint-free cloth or sponge to wipe the surface. Note that it may take several cycles of wiping and drying before the planter is completely clean. This is normal and to be expected with the texture in the fiberglass. Do not pressure wash, use alcohol based cleaners, apply corrosive cleaners or clean with anything abrasive.
